

THE CONGRESS

The International Measurement Confederation (IMEKO), which was founded in 1958, is a non-governmental federation of 42 Member Organizations, each of which is concerned with the advancement of measurement technology. The objectives of the Member Organizations are being promoted by IMEKO's 25 Technical Committees.

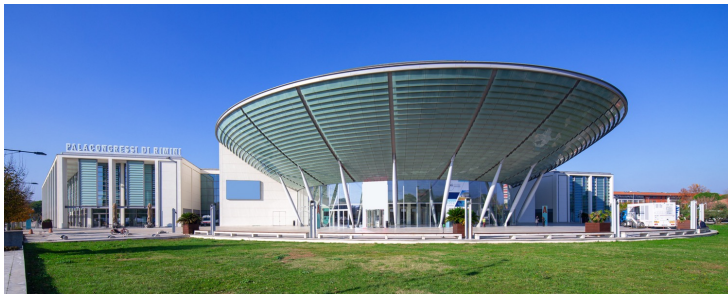

Under the motto of *Metrology for Humanity*, the 25th IMEKO World Congress will shed light on both well-established and new, highly current topics. The high-quality program will involve teams of experts, high-ranking speakers and internationally leading metrologists who will provide insight into the diverse and innovative fields of metrology.

THE VENUE

The new Rimini Palacongressi is one of the largest conference centres in Europe with a total capacity of 9,000 seats in 39 halls and is unique in Italy. This impressive structure, which focuses on environmental protection, technological innovation and maximum flexibility of use, has a 4,700-seat main hall and a 1,540-seat amphitheatre. Natural light is the star of the venue, flooding and embellishing the spaces and installations, making every event more pleasant and liveable, attractive and comfortable.

The convention centre is located in a project to renew the urban green spaces, which includes a series of parks with pedestrian and cycle paths connecting the seafront to the city centre, making everything easily accessible.
